AMCS enters into agreement with Strandmøllen A/S to provide an ULTRA-AL™ in Sweden

Bedminster, New Jersey, (November 30, 2012)

AMCS Corporation, an international supplier of industrial gases and process plants and equipment, has entered into an agreement with Strandmøllen A/S, a leading Scandinavian industrial gas supplier, to provide a fully customized ULTRA-AL™ merchant Air Separation Plant (ASU). The ULTRA-AL™ ASU is current state-of-the-art in cryogenic plant technology with superior performance, high levels of automation, and flexible operation. The plant will provide liquid oxygen, liquid nitrogen, and liquid argon products along with low-pressure gaseous nitrogen. The ULTRA-AL™ plant design is highly packaged, significantly reducing field erection and installation time and costs.

“We are pleased that Strandmøllen A/S has chosen AMCS as the supplier for their plant in Sweden. We respect the professionalism and industry knowledge of the Strandmøllen team. Strandmøllen had special requirements for the plant due to their operating experiences in Scandinavia. We were able to customize our ULTRA-AL™ plant to meet these special requirements and local site conditions,” said Ishmael Chalabi, President of AMCS.

AMCS' experienced professionals and technologists hold several key technology patents and are recognized industry experts in process design, adsorption technologies and mechanical design. A leading global supplier of process plants, AMCS provides technology, equipment, construction and engineering services to the industrial gases, energy, chemicals, environmental, electronics, pharmaceuticals, glass and metals market business sectors. Along with plants producing oxygen, nitrogen, argon, neon, helium, krypton, and xenon, AMCS supplies plants for high-purity electronic gases production, liquefied natural gas production, gas processing application and shipboard process plants. As a full service company, AMCS has successfully executed projects in North America, Europe, South America, Africa, Asia, and Australia/New Zealand. AMCS' products, technology, and capabilities are available on its website: <http://www.amscorp.com>.

Strandmøllen is a Danish gas company established over 90 years ago with operations in Denmark (Strandmøllen A/S) and Sweden. Strandmøllen is a full-line supplier of gases and equipment to a wide range of end-user industries, spanning five key business areas: iron and steel industry, health sector, laboratories and pharmaceutical industry, food industry, and processing and environment sector. Strandmøllen offers a complete range of pure gases with the appropriate equipment, technology and consulting services and, in addition to its own production of gases, cooperates with other producers for the supply of other specialist products.
