AMCS Corporation announces commissioning of ULTRA-L-250™ for SOL Group in Southern Italy

Bedminster, New Jersey, (April 9, 2013)

AMCS Corporation, a New Jersey based international supplier of industrial gases and process plants, announced the successful commissioning of a new 250-tons per day Nitrogen Liquefaction Unit (ULTRA-L-250™) in Salerno, Italy for its client, SOL S.p.A. a leading European gas company. The Salerno ULTRA-L-250™ successfully went on stream by the end of 2012.

The new liquid Nitrogen plant is one of the ULTRA-L™ series of highly efficient standard liquid Nitrogen plants featuring AMCS' latest process cycle design, and offering competitively low life cycle costs. The Salerno ULTRA-L-250™ which is deeply integrated with the existing Air Separation plant exceeded its design and performance criteria, significantly enhancing the production facility's performance and competitiveness. "This is the second plant that we have successfully delivered and brought onstream for our valued client SOL. In a complex project like Salerno, a great deal of interaction takes place between the plant supplier and the customer and the success of this project owes as much to the professionalism and competence of the SOL team as it does to the capability of our team," said Ishmael Chalabi, CEO and President of AMCS Corporation.

AMCS is a leading supplier of industrial gases and process plants, providing technology, equipment, and engineering services worldwide. AMCS' team is comprised of a diverse and experienced group of engineering professionals and technologists with extensive experience in the air separation, hydrogen, syngas, and natural gas industries. AMCS' professional team holds several key technology patents and its members are recognized industry experts in process design, adsorption technologies and mechanical design.

SOL S.p.A. is headquartered in Monza, Italy and the company was founded in 1927. It is listed in the Milan Stock Exchange and has over 2,500 employees and offices in 21 European countries and India. The SOL Group specializes in industrial and medical gas products and applications which are used in industrial, civil and health care applications.

AMCS Corporation supplies plants and equipment to the industrial gases, energy, chemicals, environmental, electronics, pharmaceuticals, glass, and metals market sectors. Along with plants producing oxygen, nitrogen, argon, neon, helium, krypton, and xenon, AMCS supplies plants for high-purity electronic gas production, liquefied natural gas production, gas processing applications and ship board process plants. As a full service company, AMCS has successfully executed turn-key projects in North America, Europe, South America, the Middle East, and the Far East.
